

Our services

We offer:

- Matchmaking with companies and/or research providers suited to your individual needs
- TINCA: an ever-growing nanoplayers database
- Brokerage of research facility use
- NANORA Masterclasses on hot nanotechnology topics
- Organization of trade missions to promising nanotechnology markets within and beyond Europe
- Information on regional, national and European funding schemes suitable for nanotechnology players
- Easy-to-use tools and materials for outreach activities on nanotechnology targeted at pupils or the general public

For details visit www.nanora.eu and contact a NANORA Access Point listed on www.nanora.eu/nanora-access-points.

Or drop us a line at info@nanora.eu.

Services for nanotechnology stakeholders

NANORA

Nano Regions Alliance

NANORA – The Alliance

NANORA – the Nano Regions Alliance – funded by the European Union through the INTERREG IVB NWE Programme, aims at improving framework conditions and support infrastructures for nanotechnology stakeholders. Its objectives are:

- to develop joint cross-regional business collaborations and supports for companies using nanotechnology expertise to develop more competitive products.
- to open new market opportunities for SMEs by taking joint transnational actions for new target markets and
- to ensure outreach to policy level and long-term anchoring of the Alliance in the regions.

The project is based on the conviction that the European regions need to engage in concerted action to be successful in the global competition for nano-enabled economic growth.

You are an SME with expertise in nanotechnology ?

Or an SME in search of nanotechnology expertise ?

You need a partner for an R&D project ?

You wonder who else is there in your region, your country, throughout Europe ?

Then NANORA is for you. Nanotechnology support stakeholders from several European regions have teamed up to provide you with targeted services. Find out what our unique network of public policy institutions, associations, clusters and research and technology centres can do for you.

NANORA Members

NANORA unites participants from nanotechnology-strong regions from Belgium, France, Germany, Great Britain, Ireland, the Netherlands and Poland committed to supporting nanotechnology as a key enabling technology.
